Professional Summary

Product Software Engineer with 4+ years of experience delivering enterprise legal-technology solutions, Java integrations, microservices, and AI-powered automation. Experienced in client requirement analysis, production support, stakeholder collaboration, and building internal engineering tools using MCP, RAG, and agentic AI. Aspiring to grow into product ownership and technology leadership roles by combining technical expertise, customer understanding, and cross-functional delivery.

Skills

- Programming- Java, Python, Groovy, TypeScript, HTML, CSS
- Backend- Spring Boot, Microservices, REST APIs, Microsoft SQL Server
- AI and Automation- MCP, RAG, Agentic AI, GitHub Copilot, Claude Code, OpenAI, Playwright, Perplexity
- Cloud and Tools- Visual Studio Code, GitHub, Jira, Bitbucket, Helix, Confluence, Jenkins, Azure, Postman, IntelliJ and SQL Server Mgmt studio
- Engineering- CI/CD Pipelines, Agile, Scrum, Code Reviews, API Designs, SDLC
- Product & Delivery- Requirement discovery, User story writing, stakeholder collaboration, backlog refinement, feature scoping, Agile delivery, release planning and production feedback analysis

Experience

- **Wolters Kluwer ELM Solutions (Persolkelly)** 03/2022 - 10/2022
Project Intern
Assisted in development and maintenance activities for Wolters kluwer ELM solutions. Gained expertise in core Java, micro services and production support processes.
- **Wolters Kluwer ELM Solutions** 10/2022 - 04/2025
Associate Product Software Developer
Transitioned from contractor to full time employee based on performance. Contributed to client specific feature developments, bug fixes and production deployments. Automated repetitive tasks through internal initiatives such as Cascading Filters and Release Notes Automation which reduced processing time from hours to minutes. Implemented auto matter number generation based on financial years for zurich. Resolved critical production issues including invoice penny issues for DWS. Developed and maintained integrations between internal systems and third party services.
- **Wolters Kluwer India Pvt Ltd** 04/2025 -
Product Software Engineer
 - Develop and enhance enterprise legal-technology modules for global clients, including HCA, Raymond James, Zurich, Citi Bank, Manulife and Canadian Pacific.
 - Build and maintain inbound and outbound integrations between client systems and Third party systems.
 - Collaborate with business analysts, QA engineers and client stakeholders to convert business requirements into scalable technical solutions
 - Automate service-management workflows for invoice processing issues, reducing manual intervention and repetitive operational work.
 - Contribute to internal AI and developer productivity initiatives involving MCP, RAG, agentic workflows and test automation
 - Support requirement analysis, technical design, development, testing, deployment and production

issue resolving

Internal Initiatives- Wolters Kluwer

- **Plancraft Agent**
Developed an MCP-based AI planning agent that converts SOW documents into structured JIRA ready development plans using product-domain knowledge and AI-assisted analysis.
- **Product Copilot Agent**
Developed an enterprise MCP Server with more than 100+ tools supporting domain knowledge retrieval, database connectivity, Jenkins automation, Rest API integration, code generation and browser automation.
- **Playwright Testcase Automation**
Developed TypeScript based playwright automation for end to end testing of Passport and T360 products, reducing repetitive manual QA activities.
- **Managed Service Automation**
Automated end to end service management workflows of invoice in error manager for clients production environment, reducing manual interventions and repetitive works.
- **Release Notes Automation**
Streamlined the release documentation by automating generation of release notes by using VS Code trained LLM model with the documents we previously used for clients developed frontend UI and interacted with agent in backend
- **Cascading Filters Automation**
Automated repetitive filtering tasks across product modules, significantly boosting developers productivity.

Career Interests

- Product ownership, People leadership, Cross-Functional delivery, Team management, Business development, Stakeholder management and Product Strategy
- Technical Product Management, Product strategy, Customer product discovery, roadmap planning, cross functional leadership, and AI-powered product development

Leadership And Professional Development

Toastmasters International

Motivational Strategies Pathways- (Jun 2024 - Present)

- Developing leadership skills, public speaking, active listening, audience engagement and team motivation skills.
- Secured third place in the International Speech Contest- Area Level
- Secured second place in the Humorous Speech Contest- Area Level
